

Acids / Bases End of Unit Checklist

Definitions				
	Can do / explain now	After Peer Discussions	After revision worksheet	Final check before test
Know the name and formulae of common acids and bases				
Know common indicators and their colours in acidic and alkaline conditions				
Explain what the pH scale represents				
Acids				
Bases / alkalines				
MASH reactions				
BASH reactions				
CASHCO reactions				
Skills				
Explain how to make an indicator from natural substances				
Test for hydrogen gas				
Test for oxygen gas				
Test for carbon dioxide gas				
Extract dissolved salts from solution				
Write word equations				
Write balanced chemical equations**
